YOCIE YONESHIGUE VALENTIN

Medicines From the Ocean

Brazilian oceanographer Valentin was one of the pioneers in the use of deep-water seaweed extract to produce medications against viruses such as HIV. She studies substances produced by algae that could lead to treating or preventing blood clotting problems.

This poster was developed as a part of a subseries in the context of the All-Atlantic Ocean Research and Innovation Alliance (AAORIA). Ingenium, Fisheries and Oceans Canada and Canadian Commission for UNESCO are committed to encouraging and empowering women and girls in science, technology, engineering, and math.
